

SUPERFAN

INTERACTIVE EXPERIENCE

BRAINSTORM

come up with three different ideas of themes + interactive features

Idea 1: video games

Theme: The main theme for this one is that there will be multiple titles or symbols of different video games and whatever one you choose, all the other divs with the video game titles will change to characters that are in the game.

The first interaction is you click on one of the gaming titles/icons, it will change the other games to a character from that game. The second interaction is when you click on one of the characters they will either say a voiceline or a their victory theme plays. The third interaction is when you click on all the characters, the main theme song of the game will play.

PHASE 0

Idea 2: Marvel vs Dc

The main theme in my next theme is you first pick a side between Marvel and Dc and whatever you pick, you go to a screen of either Marvel or Dc heroes and when you click on either of them, the main theme plays

The first interaction is when you click on the Marvel or Dc symbol, you go to a screen with images of heroes from whatever franchise you pick. The second interaction is when you click on a hero, their main theme plays

Idea 3: mythology

This theme will focus on mythology or religions from around the world and it will be an educational website where you will get a summary of different gods from the mythology

The first interaction is when you click on one of the images here, it will take you to a section with images of gods from that mythology or religion. The second interaction is when you click on the image of a god, it will give you a summary of each god on who they are and their role.

EVALUATE

think about the good and bad for each idea then choose one

PHASE 1

Pros/Cons of Each Idea:

	Pros	Cons
Idea 1: Video game	I can easily find images of diff characters and clear ones. It is formatted in a way that will make it responsive easily and the adding in the code will be simple enough	There is a lot of code that will need to be done because of the among of characters and sounds there is
Idea 2: Marvel vs DC	The format is easy. The design will be simple and the code will make it easy for interaction	There is a lot of code that will have to go in and there could be errors along the way when moving to a different screen
Idea 3: Mythology	It is a unique website that will be done easily and quickly because there won't be alot on most of the screens and it will be easy to just write in words	It might be hard to do it on a phone because there will be a lot of info to it

CONTENT

gather and edit essential content for your site

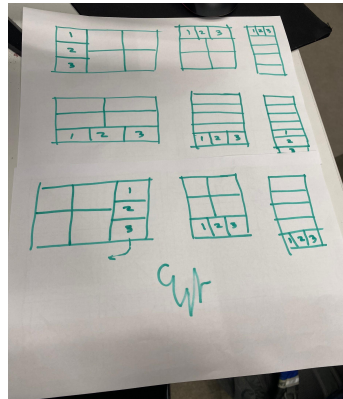

PHASE 2

DESIGN

create three possible responsive designs for your chosen idea

PHASE 3

MOCKUP

choose your final layout and create a digital mockup

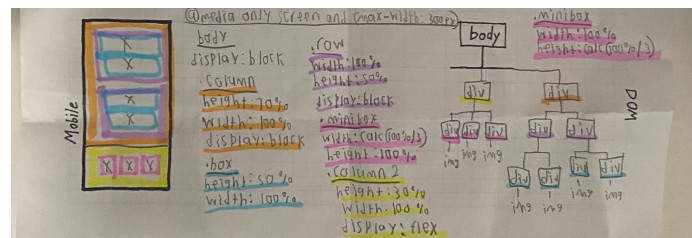

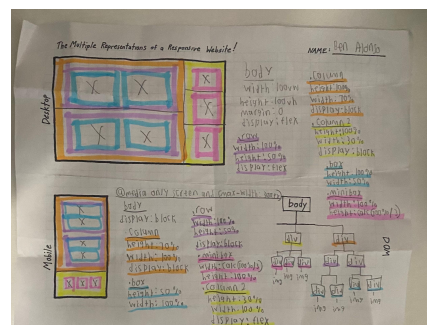

PHASE 4

ANNOTATE

add explanations, colors, percentages, and display properties + draw your dom

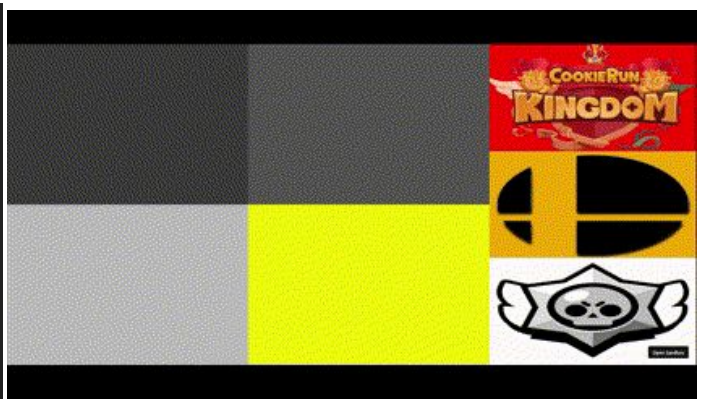

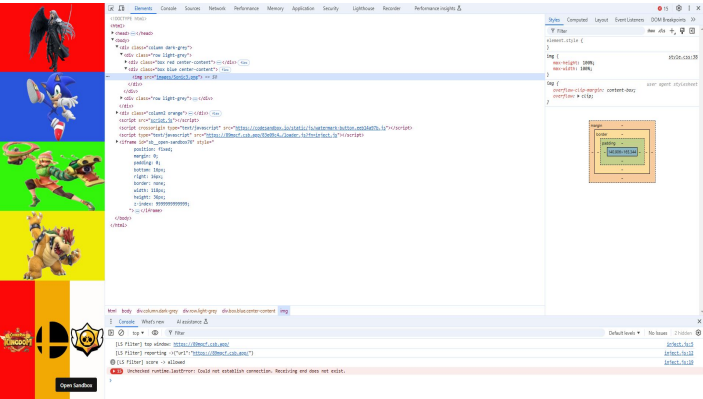

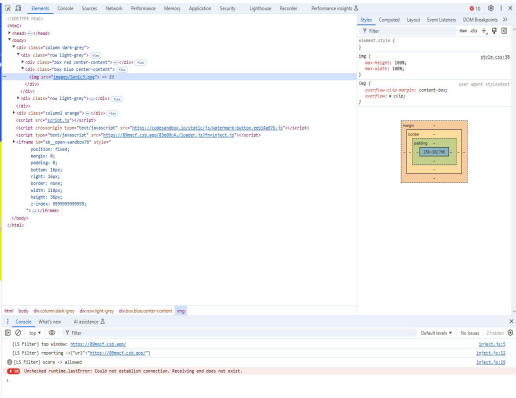

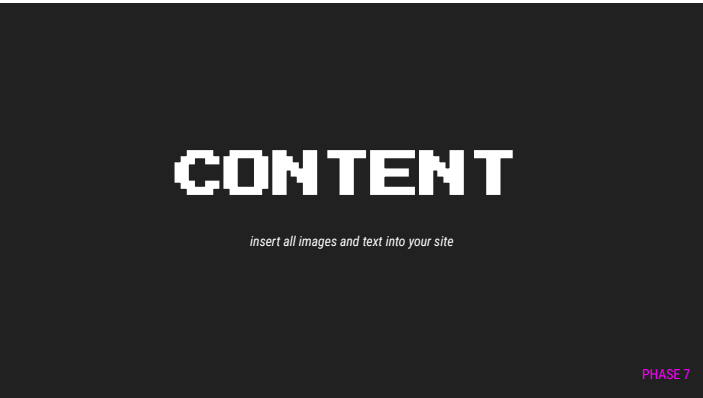

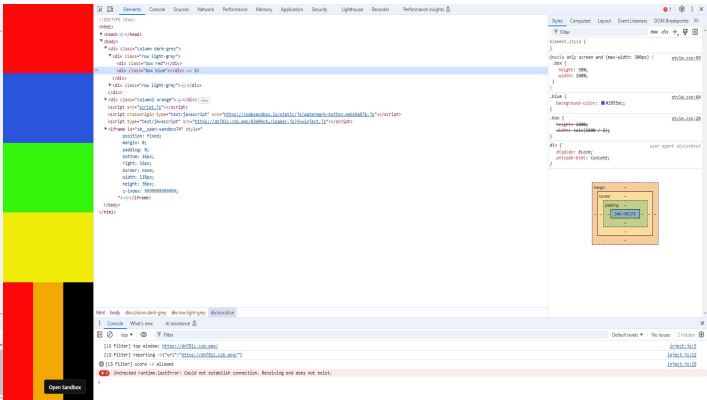

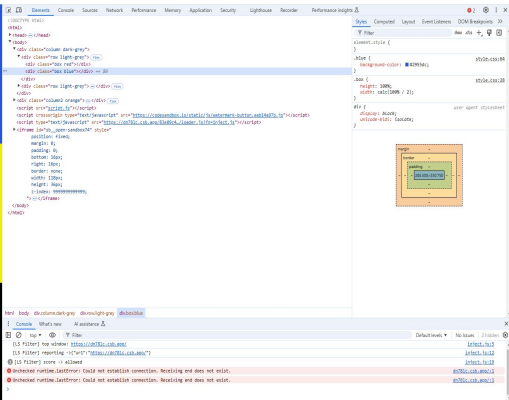

PHASE 5

BUILD

create your desktop divs using html and css then make it responsive

PHASE 6

ENHANCE UX

add in effects when the user hovers and clicks to make the page intuitive and fun

PHASE 9

TEST+ITERATE

get feedback from users then make revisions to your user interface

PHASE 10
